NAME

plot — graphics filters

SYNOPSIS

plot [—T*terminal* [raster]]

DESCRIPTION

These commands read plotting instructions (see *plot*(5)) from the standard input and in general produce, on the standard output, plotting instructions suitable for a particular *terminal*. If no *terminal* is specified, the environment parameter $TERM (see *environ*(7)) is used. Known *terminals* are:

300   DASI 300.
300S   DASI 300s.
450   DASI 450.
4014   Tektronix 4014.
ver   Versatec D1200A. This version of *plot* places a scan-converted image in **/usr/tmp/raster** and sends the result directly to the plotter device, rather than to the standard output. The optional argument causes a previously scan-converted file *raster* to be sent to the plotter.

FILES

/usr/lib/t300
/usr/lib/t300s
/usr/lib/t450
/usr/lib/t4014
/usr/lib/vplot
/usr/tmp/raster

SEE ALSO

plot(5), term(7).

BUGS

There is no lockout protection for **/usr/tmp/raster**.
